Fishers Tigers Lacrosse Scorebook

Scorekeeper Startup Guide • Setup time: about 5 minutes

Welcome! This guide gets you set up to keep score. You only have to do the one-time setup **once** on your device. After that, you'll just open the app and start the game.

What you'll need before you start

- A phone, tablet, or laptop with internet.
- The **app web address** (link to the scorebook).
- The **Script Link** — a long web address I will send you. This connects the app to our team's stats sheet.
- The **Stats PIN** — a short number I will send you, needed to save a game.

> Keep the Script Link and PIN handy. You'll paste them in during setup.

Part 1 — One-time setup (do this once per device)

Step 1: Open the app

1. Open your web browser (Chrome, Safari, Edge — whatever you normally use).
2. Go to the app web address I sent you.
3. You should see the scorebook with four buttons across the top: `Game` `Roster` `History` `Settings`

> **Tip — add it to your home screen (optional but handy):**
>
> - **iPhone/iPad:** tap the Share button, then "Add to Home Screen."
> - **Android:** tap the menu (three dots), then "Add to Home screen."
>
> This gives you a tap-to-open icon so you don't have to type the address again.

Step 2: Connect the app to our stats sheet

1. Tap the `Settings` button at the top.
2. Find the box labeled **"Google Apps Script URL."**
3. **Paste the Script Link** I sent you into that box. (To paste: tap and hold inside the box, then choose **Paste**.)
4. Tap `Save`.

Step 3: Make sure the connection works

1. Still on the **Settings** screen, tap `Test Connection`.
2. You should see a small message confirming it connected.

- ✅ **If it says connected** — you're good, go to Step 4.
- ❌ **If it shows an error** — double-check you pasted the **entire** Script Link (they're long and easy to cut off). Re-paste it, tap **Save**, and try **Test Connection** again. If it still fails, contact me.

Step 4: Load the team roster

1. Tap the `Roster` button at the top.
2. Tap `Pull Roster from Sheets`. The player list fills in automatically.
3. Tap `Pull Officials from Sheets` (this loads the referee/officials names you'll pick from before a game).

> That's it — setup is done. You won't need to repeat Part 1 on this device.

Part 2 — Getting ready for a game

Do this shortly before game time.

Step 1: Open the app and check the roster

1. Open the app (tap your home-screen icon, or go to the web address).
2. Tap `Roster` and confirm the players are listed. If the list looks empty or out of date, tap **Pull Roster from Sheets** again to refresh it.

Step 2: Set up the game

1. Tap the `Game` button at the top.
2. Fill in the game details:
   - **Opponent name**
   - **Date** (it usually defaults to today)
   - **Location** (Home or Away)
3. Tap `Start Game`.
4. A short pop-up appears to capture game details (weather, officials, start time, etc.). Fill in what you know and tap **Start Game** again to begin. Anything you're unsure of can be left as-is.

> You're now ready to score the game. 🚀

Part 3 — Saving the game (the PIN)

When the game ends and you save it to the team sheet, the app will ask for the **Stats PIN** the first time on your device.

1. When prompted, type the **Stats PIN** I sent you.
2. The app remembers it on that device, so you won't be asked again.

Why the PIN? It protects our official stats so only our scorekeepers can save games. Viewing the app, loading the roster, and keeping score never need the PIN — only **saving** a finished game does.

If you ever mistype it or need to change it: go to `Settings` → **Stats PIN** → **Change / Clear Saved PIN**.

Quick troubleshooting

What you see	What to do
"Set Apps Script URL in Settings first"	You skipped Part 1, Step 2. Go to **Settings**, paste the Script Link, tap **Save**.
Roster is empty	Tap **Roster** → **Pull Roster from Sheets**.
Test Connection fails	Re-paste the **full** Script Link (they get cut off easily), tap **Save**, try again.
App looks like an old version	Fully close the browser and reopen it.
Game won't save / asks for PIN	Type the **Stats PIN** I sent you. If rejected, use **Settings** → **Stats PIN** → **Change / Clear Saved PIN** and re-enter it.

Game-day checklist

- ☐ App opens and shows the four tabs
- ☐ Roster is loaded and current
- ☐ Opponent, date, and location entered on the **Game** tab
- ☐ Stats PIN handy for saving at the end
